LAB RULES

Working in the lab and I'm thinking about safety
(Got goggles drawn, and lab coats on)
Open-toe shoes outta here, are you going crazy?
(Things could go wrong, things could go wrong)

My gloves… They make me safe around the chemicals, the chemicals
My love… Tie back your hair and prep materials, the materials

***One**; don't taste or sniff - You know you should be wafting if you're taking a whiff*
***Two**; don't mix it in - until the label's checked again*
***Three**; no food or drink - Unless you wanna have us find you dead in the morning*
And if you follow this, you will mitigate the risk
I got lab rules, I count 'em - I got lab rules, I count 'em
Long hair tied back against myself
I got lab rules, I count 'em - Now go and tell 'em to a friend

One; don't taste or sniff - You know you should be wafting if you're taking a whiff
Two; don't mix it in - until the label's checked again
Three; no food or drink - Unless you wanna have us find you dead in the morning
And if you follow this, you will mitigate the risk
I got lab rules, I count 'em
